**DETAILED ACTION**

1. Applicant's election without traverse of Group II in Paper No. 7 is acknowledged.
2. Preliminary amendment filed 27 November 2002 (Paper No. 7) has been entered.

***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 16 is rejected under 35 U.S.C. 101 because the claimed invention is not supported by either a substantial asserted utility or a well established utility.

The claims are directed to Zneu1 polypeptide which is an orphan neuro-growth factor. The claimed polypeptides do not have well established utility because different growth factors with similar homology have different functions and the a skilled artisan would have to determine the function of the growth factor. The claimed polypeptides do not have substantial utility because the skilled artisan would need to prepare, isolate, and analyze the protein in order to determine its function and use. Therefore, the invention is not in readily available form. Instead, further experimentation of the protein itself would be required before it could be used.

Claim 16 is also rejected under 35 U.S.C. 112, first paragraph. Specifically, since the claimed invention is not supported by either a substantial asserted utility or a

well established utility for the reasons set forth above, one skilled in the art clearly would not know how to use the claimed invention.

4. No claims are allowed.
